The Purpose:
Civics requires mastery of A LOT of ideas, concepts and facts. The purpose of this project is to physically illustrate how the concepts we’ve learned relate to each other. This will promote a deeper understanding of our content and make Civics a whole lot easier!

The Materials:
- Constitution Connections board
- Lined notebook paper

The Instructions:
On the back of this paper is a map of 36 “connectable” concepts. Using these concepts, you will summarize WHY they are related. The summary is a “connection”. For example:

1. You must complete all **50 connections**.
2. The connections must be written on lined notebook paper, not printed, and must be numbered appropriately.
3. Your handwriting MUST be neat and legible. If I cannot read it, it will **NOT** count for credit.
4. The connections must be in your own words and must clearly explain the connection.
5. The quality of the connection is very important. A simple connection will only earn partial credit, so be sure to fully explain the connection and add in as much relevant information as you can.

**Scoring:**
- Neatness & Organization: 10 points
- Quality of Connections: 50 points
- **Total: 60 points**
